

## STAGE 4 INTRODUCTORY ELECTIVE - INDUSTRIAL TECHNOLOGY (TIMBER INDUSTRY)

## Footstool | 50-period teaching program

2027 early-implementation review copy | Industrial Technology 7-10 Syllabus (2025) | v2.0

| Course          | School-developed Stage 4 introductory elective            | Syllabus       | Industrial Technology 7-10 (2025)                    |
|-----------------|-----------------------------------------------------------|----------------|------------------------------------------------------|
| Delivery        | 2027   20 weeks   50 x 60-minute periods                  | Pattern        | 5 periods per fortnight                              |
| Lesson balance  | 10 Site/theory   10 Project/folio   30 Practical          | Implementation | Early implementation confirmed by Steve, 28 Aug 2026 |
| Official source | NSW Curriculum official page   verified 28 Aug 2026       | Focus          | Project development + Timber industry                |
| Status          | Local teacher review copy   Word, PDF and manifest   v2.0 | Course hours   | This unit alone is not the NESA 100-hour elective    |

The complete official outcome set appears below. Period rows identify the outcomes directly supported by this 50-period unit. INT5-IND-01 is not claimed as delivered by the current site and must be mapped elsewhere if this unit contributes to a full 100-hour elective.

## Official Stage 4 adjustment and Stage 5 outcomes

| Outcome     | Exact official wording                                                                                       | Outcome     | Exact official wording                                                                        |
|-------------|--------------------------------------------------------------------------------------------------------------|-------------|-----------------------------------------------------------------------------------------------|
| INT4-ADJ-01 | in Stage 4 teachers may adjust the Stage 5 outcomes as appropriate to the needs of students in Years 7 and 8 | INT5-USE-01 | selects and justifies the use of materials, tools and equipment to undertake projects         |
| INT5-SAF-01 | applies risk management and safe work practices in industrial technology contexts                            | INT5-EVL-01 | evaluates the functional, aesthetic, economic and environmental qualities of products         |
| INT5-COM-01 | communicates ideas and processes in industrial technology contexts                                           | INT5-INP-01 | analyses and applies a range of industrial processes in production contexts                   |
| INT5-ENV-01 | assesses the impact of industrial activities and practices on society and the environment                    | INT5-PRO-01 | demonstrates practical skills in the production of projects                                   |
| INT5-DES-01 | selects and applies design, project management and technical skills in project production                    | INT5-IND-01 | investigates and explains a range of industry careers, enterprise opportunities and practices |

## What students are learning

| Learning focus                | In plain English                                                                          | Learning focus                 | In plain English                                                                   |
|-------------------------------|-------------------------------------------------------------------------------------------|--------------------------------|------------------------------------------------------------------------------------|
| Safe work                     | Recognise hazards, follow current controls and use approved workshop methods.             | Materials, tools and equipment | Explain suitable choices and use only teacher-approved tools and equipment.        |
| Communication                 | Use terminology, drawings, images and written evidence to explain the project.            | Evaluation                     | Judge function, appearance, quality, cost and environmental impact using evidence. |
| Environmental responsibility  | Compare material and production choices and their effects on society and the environment. | Industrial processes           | Explain how timber processes and quality checks contribute to production.          |
| Design and project management | Develop, plan, manage and refine the Footstool project.                                   | Practical production           | Apply safe, accurate and quality-focused practical skills to the approved project. |

## Teacher-to-confirm register

| When                  | Decision needed                                                                                      | Confirm by                |
|-----------------------|------------------------------------------------------------------------------------------------------|---------------------------|
| Before the unit       | Confirm how this 50-hour unit contributes to the school's elective structure and any 100-hour course | Head Teacher TAS / school |
| Before assessment     | Task authority, outcomes, marks, dates, conditions, adjustments and submission method                | Teacher / faculty         |
| Before practical work | Current plan, permitted variations, induction, SOPs, tools, PPE, supervision and risk controls       | Teacher / faculty         |
| Before finishing      | Approved finish, SDS/product instructions, area, drying and storage arrangements                     | Teacher / faculty         |

# Teaching program | Periods 1-10

10 x 60-minute lessons. Site/theory and Project/folio labels link to the relevant website destination.

**Teacher to confirm before use: Periods 21-30 practical activity, materials, equipment, supervision, current risk controls and any formal assessment conditions.**

## Teaching program | Periods 31-40

10 x 60-minute lessons. Site/theory and Project/folio labels link to the relevant website destination.

| P  | Type                          | Focus                                              | Teaching and learning                                                                                 | Syllabus alignment                                                                                           | What the teacher checks                                               |
|----|-------------------------------|----------------------------------------------------|-------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------|
| 31 | <a href="#">Site/theory</a>   | <a href="#">Researching a personal emblem</a>      | Complete 10 checks and the guided response.                                                           | Design factors and specifications for the project<br><b>Outcomes: INT5-DES-01, INT5-COM-01</b>               | Check 10 responses and the guided response.                           |
| 32 | <a href="#">Project/folio</a> | <a href="#">Developing three emblem concepts</a>   | Complete 10 checks and the guided response; save linked folio evidence.                               | Create, modify and refine project designs<br><b>Outcomes: INT5-DES-01, INT5-COM-01</b>                       | Check 10 responses, the guided response and the folio.                |
| 33 | <b>Practical</b>              | <a href="#">Criteria, selection and refinement</a> | First 20 min: complete 10 checks and the guided response. Then continue the approved practical stage. | Evaluate design quality, function and aesthetics<br><b>Outcomes: INT5-DES-01, INT5-EVL-01</b>                | Check the site response; observe the practical and one quality point. |
| 34 | <b>Practical</b>              | Weeks 13-14 production                             | Continue approved stage; follow plan/SOP; check fit, accuracy or surface.                             | Safe workshop practices during timber production<br><b>Outcomes: INT5-SAF-01, INT5-PRO-01</b>                | Observe setup, approved process, skill, quality and clean-down.       |
| 35 | <b>Practical</b>              | Weeks 13-14 evidence                               | Finish current stage; photograph a checkpoint; record any problem/response; clean down.               | Quality checks before, during and after production<br><b>Outcomes: INT5-EVL-01, INT5-INP-01, INT5-PRO-01</b> | Check the photo, quality note and problem-response record.            |
| 36 | <a href="#">Site/theory</a>   | <a href="#">Observing practical progress</a>       | Complete 10 checks and the guided response.                                                           | Testing, quality assurance and quality control<br><b>Outcomes: INT5-INP-01, INT5-EVL-01</b>                  | Check 10 responses and the guided response.                           |
| 37 | <a href="#">Project/folio</a> | <a href="#">Recording quality evidence</a>         | Complete 10 checks and the guided response; save linked folio evidence.                               | Document, reflect on and evaluate project development<br><b>Outcomes: INT5-COM-01, INT5-DES-01</b>           | Check 10 responses, the guided response and the folio.                |
| 38 | <b>Practical</b>              | <a href="#">Action and next-step reflection</a>    | First 20 min: complete 10 checks and the guided response. Then continue the approved practical stage. | Project-management strategies for project development<br><b>Outcomes: INT5-DES-01, INT5-COM-01</b>           | Check the site response; observe the practical and one quality point. |
| 39 | <b>Practical</b>              | Weeks 15-16 production                             | Continue approved stage; follow plan/SOP; check fit, accuracy or surface.                             | Safe workshop practices during timber production<br><b>Outcomes: INT5-SAF-01, INT5-PRO-01</b>                | Observe setup, approved process, skill, quality and clean-down.       |
| 40 | <b>Practical</b>              | Weeks 15-16 evidence                               | Finish current stage; photograph a checkpoint; record any problem/response; clean down.               | Quality checks before, during and after production<br><b>Outcomes: INT5-EVL-01, INT5-INP-01, INT5-PRO-01</b> | Check the photo, quality note and problem-response record.            |

Teacher to confirm before use: Periods 31-40 practical activity, materials, equipment, supervision, current risk controls and any formal assessment conditions.

## Teaching program | Periods 41-50

10 x 60-minute lessons. Site/theory and Project/folio labels link to the relevant website destination.

| P  | Type                          | Focus                                              | Teaching and learning                                                                                 | Syllabus alignment                                                                                              | What the teacher checks                                               |
|----|-------------------------------|----------------------------------------------------|-------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------|
| 41 | <a href="#">Site/theory</a>   | <a href="#">Function vocabulary</a>                | Complete 10 checks and the guided response.                                                           | Evaluate design quality, function and aesthetics<br><b>Outcomes: INT5-EVL-01, INT5-COM-01</b>                   | Check 10 responses and the guided response.                           |
| 42 | <a href="#">Project/folio</a> | <a href="#">Testing with evidence</a>              | Complete 10 checks and the guided response; save linked folio evidence.                               | Testing, quality assurance and quality control<br><b>Outcomes: INT5-EVL-01, INT5-INP-01</b>                     | Check 10 responses, the guided response and the folio.                |
| 43 | <b>Practical</b>              | <a href="#">Planning a functional improvement</a>  | First 20 min: complete 10 checks and the guided response. Then continue the approved practical stage. | Create, modify and refine project designs<br><b>Outcomes: INT5-DES-01, INT5-EVL-01</b>                          | Check the site response; observe the practical and one quality point. |
| 44 | <b>Practical</b>              | Weeks 17-18 production                             | Continue approved stage; follow plan/SOP; check fit, accuracy or surface.                             | Safe workshop practices during timber production<br><b>Outcomes: INT5-SAF-01, INT5-PRO-01</b>                   | Observe setup, approved process, skill, quality and clean-down.       |
| 45 | <b>Practical</b>              | Weeks 17-18 evidence                               | Finish current stage; photograph a checkpoint; record any problem/response; clean down.               | Quality checks before, during and after production<br><b>Outcomes: INT5-EVL-01, INT5-INP-01, INT5-PRO-01</b>    | Check the photo, quality note and problem-response record.            |
| 46 | <a href="#">Site/theory</a>   | <a href="#">Aesthetic vocabulary</a>               | Complete 10 checks and the guided response.                                                           | Evaluate design quality, function and aesthetics<br><b>Outcomes: INT5-EVL-01, INT5-COM-01</b>                   | Check 10 responses and the guided response.                           |
| 47 | <a href="#">Project/folio</a> | <a href="#">Analysing appearance with evidence</a> | Complete 10 checks and the guided response; save linked folio evidence.                               | Evaluate design quality, function and aesthetics<br><b>Outcomes: INT5-EVL-01, INT5-COM-01</b>                   | Check 10 responses, the guided response and the folio.                |
| 48 | <b>Practical</b>              | <a href="#">Final evaluation and reflection</a>    | First 20 min: complete 10 checks and the guided response. Then continue the approved practical stage. | Document, reflect on and evaluate project development<br><b>Outcomes: INT5-EVL-01, INT5-COM-01, INT5-DES-01</b> | Check the site response; observe the practical and one quality point. |
| 49 | <b>Practical</b>              | Weeks 19-20 production                             | Continue approved stage; follow plan/SOP; check fit, accuracy or surface.                             | Safe workshop practices during timber production<br><b>Outcomes: INT5-SAF-01, INT5-PRO-01</b>                   | Observe setup, approved process, skill, quality and clean-down.       |
| 50 | <b>Practical</b>              | Weeks 19-20 evidence                               | Finish current stage; photograph a checkpoint; record any problem/response; clean down.               | Quality checks before, during and after production<br><b>Outcomes: INT5-EVL-01, INT5-INP-01, INT5-PRO-01</b>    | Check the photo, quality note and problem-response record.            |

**Teacher to confirm before use: Periods 41-50 practical activity, materials, equipment, supervision, current risk controls and any formal assessment conditions.**
